

TERRY'S LAWN CARE, LLC

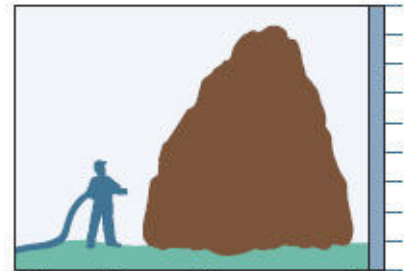

Mulch Blower Service

Our Mulch Blower will blow bark, mulch or soil into beds, play areas, or anywhere up to 150 feet from the truck (250 feet in special circumstances). This unique system is ideal for hard to reach areas, steep slopes, or narrow yards. Our long reach hoses greatly reduce damage to surface grades and minimize disruption of new plantings.

One vehicle with two attendants can spread 40 cubic yards of material in about 3 hours including clean-up. Finished jobs are evenly covered and neatly finished. All you need to do is prepare the areas by weeding and having them free of unwanted materials, or we can help you with that as well.. It's easy to see that our "Mulch Services" is a great advantage for anyone who wants to avoid the backbreaking job of spreading materials.

Using conventional means, a 5-person crew can spread 8 cubic yards per hour.

With our Express Blower, we can blow up to 40 cubic yards per hour including cleanup.

Terry's Lawn Care Blower Service, using a Finn Blower, replaces dozens of workers and cuts your job time into a fraction of what it used to be. Our trained and professional operators can apply material quickly and evenly, saving you as much as 20% to 30% in material costs alone. We can work year round, in any weather, because there's no damage to the terrain with blower hoses as compared to the high traffic of workers and wheelbarrows. If you have any questions or would like to have us give you an estimate on your next project please give Terry's Lawn Care a call and we will be happy to answer any questions you may have.

Mulch

- Single Hammered Mulch \$45.00 now \$40.00
